About MSS315(EU)

Features&Installation

To introduce primary features of Meross
Matter Smart Wi-Fi Plug with Energy
Monitor, MSS315 (EU Version)

01 Matter-Compatible Smart Plug

Meross Matter Plug MSS315 is built with the Matter protocol, allowing seamless integration and compatibility with various smart home platforms. Whether you are using Apple HomeKit, Amazon Alexa, Google Assistant, or other popular platforms, the Meross Matter Plug MSS315 effortlessly synchronizes with them, granting you full control over your devices from your smartphone or through voice commands.

02 Super Easy Setup

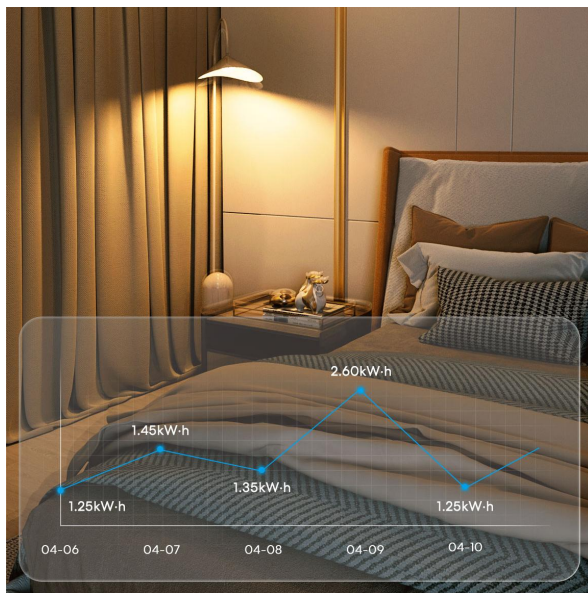

You just need to scan the code, and all is done.

The adoption of the Matter standard ensures a user-friendly and straightforward protocol, simplifying both the implementation and operation of these devices.

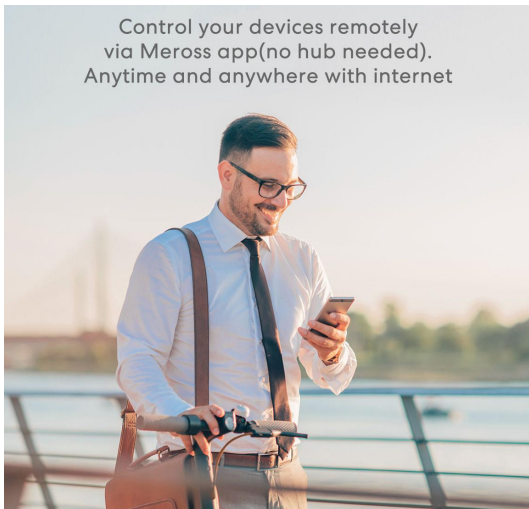

03 Energy Monitor

The energy monitor function of Meross MSS315 is a highly useful feature that provides users with the ability to keep a close eye on their electrical energy consumption in real-time.

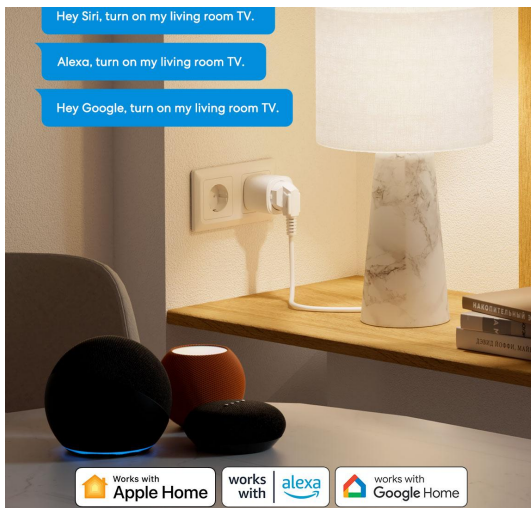

04 Smart Controls: Voice/Remote/Local Control

Voice Control: You can control your devices hands free, just give voice commands to turn on/off the connected devices. Compatible with Apple HomeKit, Siri, Amazon Alexa, and Google Assistant.

Remote Control: To enable HomeKit remote control, you need a HomePod, an Apple TV 4K, Apple TV HD, or an iPad. Set any of these Apple devices in your house as a HomeKit bridge and connect it to your home **2.4GHz Wi-Fi network**.

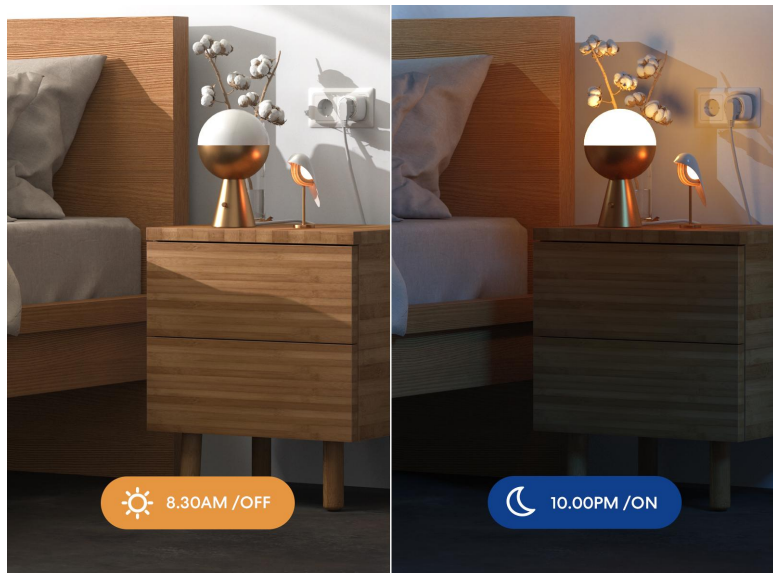

Stable and Fast Local Control: Matter device can communicate with each other locally on the network, without the involvement of a cloud.

05 Schedule and Timer Setting

You can schedule the connected devices to turn on and off automatically. Save energy when lights are not needed or left on by accident. Sunrise and sunset setting are supported.

06 Product Specification of MSS315(EU)

Product Specification	
MODEL	MSS315
Input	100-240~, 50/60Hz
Output	100-240~, 50/60Hz, 16A maximum load
Certifications	CE,WEEE
Button	1 x On/Off Button Press and hold for 5 seconds to initiate the factory reset process
LED	1 x Status LED
Dimensions (W x D x H)	5 x 5 x 6.4cm (excluding plug pins)
Wireless Standards	IEEE 802.11 b/g/n, 2.4GHz, IPv6 network required
System Requirements	Smartphone running iOS 16.1 or later or Android 8.1 or later, supporting Bluetooth 4.2 or later. Existing 2.4GHz Wi-Fi network

About Matter

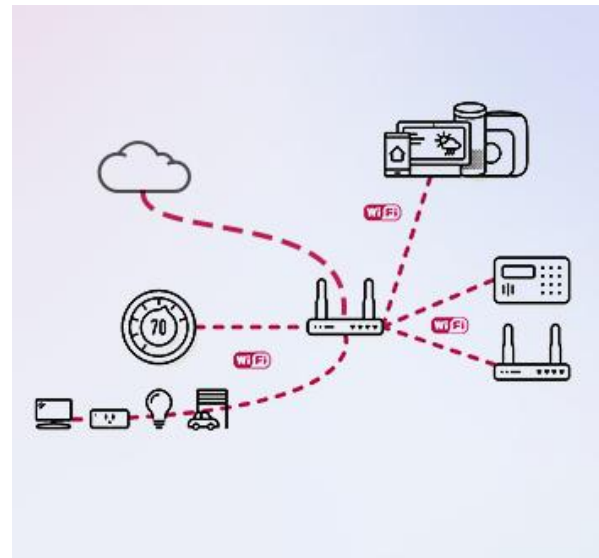

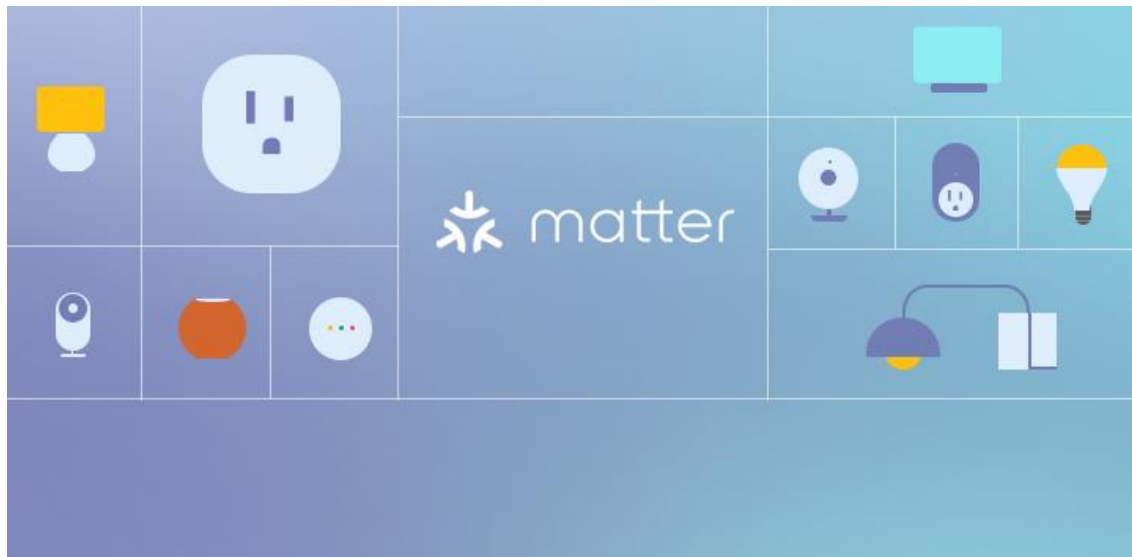

Feature

To introduce primary features of Matter:
An open-source protocol for seamless
smart home device communication across
manufacturers and ecosystems.

About Matter

Matter is a common language for smart home devices designed to simplify everything about the smart home, from purchase to setup and everyday use. Its biggest promise is making smart devices work with each other across platforms and ecosystems, no matter who made them.

No more checking for the “works with” HomeKit, Google Home, or Alexa badges — Matter devices work with all of them. It’s also entirely local, so gadgets should respond more quickly. Yes, Matter should make your smart light bulb work just as fast as your non-smart light switch.

02 Matter's Rise: Embraced by Tech Giants

In May 2021, the Matter standard was officially released by the CSA Alliance, marking its public debut. Google had previously announced that the future Google Assistant would be able to control any Matter-certified device, and Apple announced at WWDC last year that iOS would support the Matter standard, enabling users to manage their devices through the Home App.

The continued mention of Matter at this year's Google Developer Conference and Apple Software Developer Conference in 2022 further underscores its importance.

03

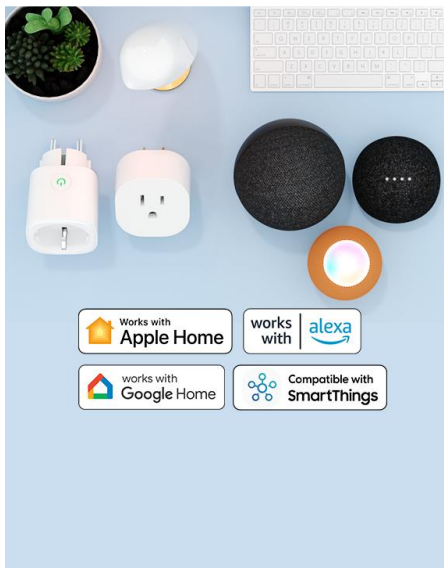

The Advantage of Matter

Strong Players Support: The Matter protocol is led by major eco-platforms such as Apple, Google, Amazon, Samsung, and more than 500 global companies joining in with rich applications and products.ng in with rich applications and products.

Unprecedented Interoperability: This Matter plug can connect to all applications, control all devices, and even connect to all cloud services. (Specialized in matter protocol)

Strong Security: Matter gives the device strong security with proven and standard cryptographic algorithms, and every message is protected. And it is completely local architecture. Never worry about security again.

Stable and Fast Local Control: Matter device can communicate with each other locally on the network, without the involvement of a cloud.

Unprecedented Interoperability

Providing greater compatibility and easier connections, one product for all platforms.

Super Reliable and Secure

Matter technology uses proven and standard cryptographic algorithms to make products more reliable and secure.

Stable and Fast Local Control

Matter devices can communicate with each other locally on the network, without the involvement of a cloud.

03

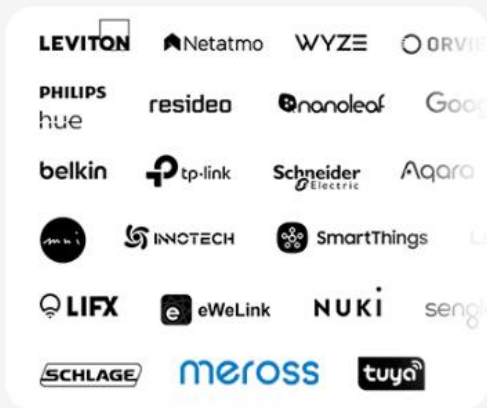

Matter & Meross

Meross Forges Strong Partnership with
Matter Platform

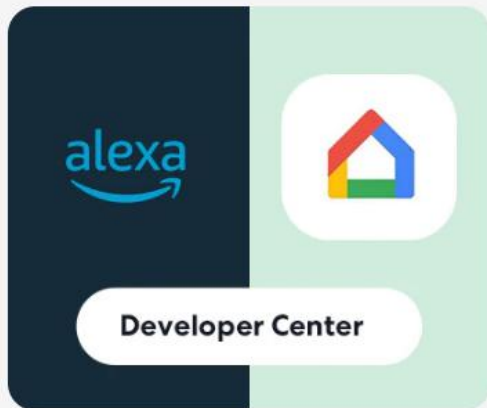

Matter & Meross

As of June 6th, 2022, during the Apple WWDC2022 conference, Apple made significant updates to iOS, iPad OS, MacOS, and WatchOS. Among the announcements was the launch of Matter, a cross-platform smart home unified platform based on HomeKit. Meross, as a leading smart home devices company, was mentioned at the press conference and is actively collaborating with prominent technology companies like Apple and Google to develop a new generation of smart home products.

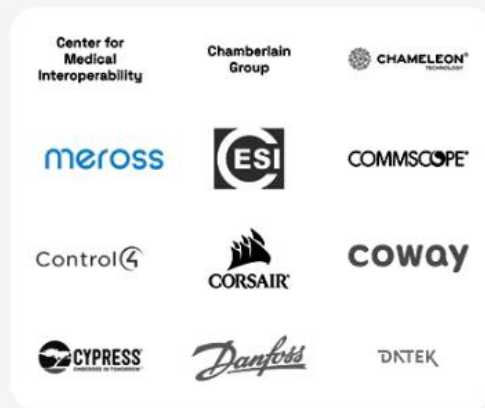

With the adoption of the Matter standard, Meross aims to create a seamless ecosystem for connecting smart home accessories. This standard serves as the foundation for enhanced interoperability and easy integration of various smart devices, making it more convenient for consumers to build and manage their smart homes.
